DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-4, 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. On lines 1-3, claim 2 sets forth that “[t]he closure ...of claim 1 further comprising a container with a container neck”. Claim 2 is considered vague and indefinite because it is unclear how a closure can comprise a container. It is also unclear if applicant is claiming the subcombination of the closure or the combination of a container and closure?

The preamble of claim 21 is drawn to a closure, however the body of claim 21 introduces a container, as an element of the closure. Claim 21 is considered vague and indefinite because it is unclear how a closure can comprise a container. It is also unclear if applicant is claiming the subcombination of the closure or the combination of a container and closure?

The dependent claims not specifically mentioned are rejected as being dependent upon a rejected base claim since they inherently contain the same deficiencies therein.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3727

4. Claims 1, 2, 5-12 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Mori et al. (U.S. 4,565,295). Mori et al. teaches a closure, shown in figure 2, having a top wall 4, a skirt 6 and a tamper indicating band at 14. The skirt has a thread 24. The frangible webs are elements 36. The annular step is shown above lead line 16 at section 18. The tamper indicating bead is element 26. The finish bead of the container is element 50.

5. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Csaszar (U.S. 4,907,708). Csaszar teaches a closure 1, shown in figure 10, having a top wall, a skirt 11 and a tamper indicating band at 12. The frangible webs are elements 14. The annular step is shown at 7a. The tamper indicating bead is shown at 7b. The finish bead of the container is element 16.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the tamper indicating bead and step of the tamper indicating band.

7. THIS ACTION IS NON-FINAL.

8. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579.
